

**NATIONAL INFORMATION DAY
ON MARIE SKŁODOWSKA-CURIE ACTIONS:
Support for mobility, training and career development of researchers**

The Marie Skłodowska-Curie Actions are part of the EU's biggest research and innovation programme Horizon 2020. Since 1996 they have provided grants to train researchers at all stages of their careers – be they doctoral candidates or experienced researchers – while encouraging transnational, inter-sectoral and interdisciplinary mobility. The aim of the event, which is organised by the Technology Centre CAS in cooperation with the European Commission and the Ministry of Education, Youth and Sports, is to present the programme, its achievements and impact on the researchers' careers as well as to encourage higher participation of Czech researchers and institutions. It will focus on promotion of the last calls in Horizon 2020 and will offer the outline of MSCA in Horizon Europe. The event is open to researchers, project managers, administrators as well as other stakeholders.

Date: 11 March 2020

Venue: Czech Academy of Sciences, Národní 3, Prague 1 (room 206)

Registration: <http://geform.tc.cz/mscainfoday2020>

PROGRAMME

09:30 – 10:00	Registration
10:00 – 10:10	Welcome
